Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. The indicated allowability of claims 13-17 is withdrawn in view of the newly discovered reference(s) to Lambert et al. and Smit. Rejections based on the newly cited reference(s) follow.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 13-17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

4. Lines 5 and 8 of claim 13 each recite "second tube-like end section". "End" should be deleted in lines 5 and 8, or all recitations of "tube like sections" should be changed to "tube like end sections".

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3738

6. Claims 13-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lambert et al. Intestinal absorption of vitamin B12 in rats with gastric reaction or gastric diversion (abstract provided) in view of Smit US PN 4315509.
7. Lambert et al. disclose a method of treating obesity comprising performing a stomach bypass in which the esophagus is connected to the small intestine loop while allowing stomach secretions to reach the intestine. Lambert et al. fail to disclose that an adjustable hollow body implant is connected within the esophagus to connect the esophagus and small intestine. Smit teach a gastric bypass implant comprising an adjustable hollow body implant for connecting within different regions of the GI tract while allowing stomach secretions to reach the intestine. See Smit figures 1-2, c5:23-29, c6:39-53, and c7:25-52.
8. Therefore it would have been obvious to one of ordinary skill in the art at the time of the invention to modify the method disclosed by Lambert et al. to connect the esophagus and stomach with an adjustable hollow body implant as taught by Smit in order to reduce absorption of food in the stomach.
